1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Page 1, line 1, after "10/257,638" insert, ---**now U.S. Patent No. 6,739,355**,---

2. The following is an examiner's statement of reasons for allowance: After a review of Applicant's remarks it is believed that the double patenting rejection is incorrect wherein it would not be obvious to modify the claims of the '355 reference with U.S. 3,858,616 to **Thiery et al.** in order to produce the claimed invention wherein **Thiery et al.** does not disclose the a pressure amour within the inner layer having adjoining profiles nor a number of interlocking profiles. The armoring shown in figs. 2 and 3 is the cross-section view of the armoring layers (5 and 6), which are both outside of the inner layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
